

# *Martin*. Single Source for Innovative Material Handling Products/Systems.

Standard products and systems? Faster delivery than anyone in the business with over sixteen manufacturing and distribution points in key cities with a network of distributors nationwide.

Special products and systems? Trained specialists that can provide innovative solutions for almost any kind of bulk material problem. We're experienced working with stainless, mild and abrasion resistant steels. Even aluminum and special-coated materials. Metal performance improvements from shot peening, hard surfacing, exotic paint systems... to synergistic coatings. All applied to screw conveyor systems, bucket elevators, vertical screw

and drag conveyors.

We'll even test the materials you have to move, to make sure that what you wanted is what you get. Learn more about our material handling capabilities...in products...in complete systems.

For more information, contact your local *Martin* Distributor.

**Sold by the World's Greatest Sales People,  
Our Distributors**
