Martin's New "QRS" Split Sprocket.

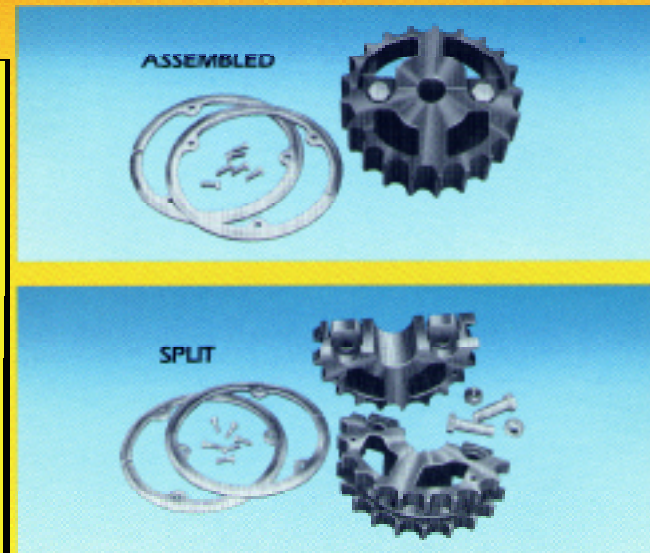

REPLACE THE SPROCKET
LEAVE THE SHAFT INTACT.
INTRODUCING THE
NEW "QRS" SPLIT SPROCKET
FOR FLAT-TOP CONVEYOR
CHAINS. THE ANSWER TO
THE PROBLEM OF CORROSION
AND QUICK REPLACEMENT,

It's a new concept in split sprockets. And they're manufactured from both steel and thermoplastic materials to meet whatever your application problems.

The new "QRS" Series 815/820 Quick Replacement Split Sprockets do away with the time-consuming and costly dismantling of shafts and pillow blocks to remove worn sprockets. Now all that's required is a common wrench.

Stocked in 21, 23, 25 and 27 tooth sizes. Available with solid and grooved face, and furnished with rust resistant plated bolts and nuts. Also available are plated carbon steel or stainless split guide rings for easy assembly
